MEMORANDUM

Arnold Schwarzenegger
Governor

TO: Randy Segawa
Senior Environmental Research Scientist (Supervisor)
Environmental Monitoring Branch

FROM: Bruce Johnson
Senior Environmental Research Scientist
Environmental Monitoring Branch
(916) 324-4106

DATE: January 9, 2004

SUBJECT: EFFECT OF AIR RESOURCES BOARD CORRECTIONS RECEIVED IN
JANUARY 2004 ON CALCULATION OF METHYL BROMIDE TOWNSHIP
CAP

Lin Ying Li incorporated the Air Resources Board corrections (Cook 2003) into his analysis and provided me with the effective data change: CRS-9 week average changed from 2.76 ppb to 2.75 ppb. I modified this data point in the tolerance interval spreadsheet analysis and recalculated the township cap. The result was 266,206 lbs/township/month compared to the earlier calculation, which was 266,194 lbs/township/month. In other words, there was no significant impact of the Air Resources Board changes on the township cap calculation.
