**Sunnyside Area
Fresno County Field Notes**

Field Sampling Date:
July 24-28, 2000

Purpose: The Environmental Hazards Assessment Program monitored applications of carbaryl for GWSS control in Fresno County in the Sunnyside area. This was the second application of carbaryl to the Sunnyside area. Applications started on Monday, the 24th of July. All of the following samples were collected from one property located on East Atchison Street. All air samples collected this week used SKC personnel pumps mounted with XAD2 resin.

7/24 Mount background air sample;
Collect background leaf punches from grapevines

7/25 Collect background air sample;
Collect spray period air sample; Collect post spray leaf punch sample; Collect tank sample; Mount first 24-hour post spray air sample

7/26 Collect 24-hour post spray air sample; Mount 48-hour post spray air sample

7/27 Collect 48-hour air sample

7/28 Collect 3-day post harvest interval fruit (4 samples total from peach, nectarine, plum and tomato)

Staff will also attend a public meeting to present the GWSS program to residents of the third proposed treatment area within Fresno County. The meeting will take place on Friday, July 28, at the Clovis Memorial Hall from 3 to 7 PM.
