PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Health Hazard: Terr-O-Gas® 67, when not performing tasks with liquid contact potential, is non-irritating to the skin, eyes, and mucous membranes. If inhaled, may cause irritation to the respiratory tract. In case of contact, rinse and flush immediately with water. If irritation persists, seek medical attention. Ingestion may cause stomach irritation, abdominal cramps, nausea, and vomiting. It is a violation of Federal law to use this product in a manner inconsistent with its labeling. PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Methyl bromide and chloropicrin have certain properties and characteristics in common with other methyl bromide and chloropicrin. They are flammable. They are toxic by inhalation, ingestion, and skin absorption. They are corrosive to metals. They are toxic to aquatic life. 

OTHER HAZARDS

Methyl bromide and chloropicrin are highly toxic and should not be inhaled, ingested, or absorbed through the skin. No use of this product is allowed in or on a residential structure.

If inhaled, get fresh air immediately. Provide artificial respiration if necessary. If in eyes, flush with water for 15-20 minutes. If swallowed, do not induce vomiting. Call a Poison Control Center or a physician immediately for further advice. In all cases of overexposure, get medical attention immediately. Take person to a doctor or emergency treatment facility.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any required protective equipment, see the Supplemental Label or Toxic Cancer Group Label. A self-contained breathing apparatus (SCBA) is not permitted for routine handling. Observation of this requirement for personal protective equipment is an acceptance of the risk of exposure to this product, and the user assumes all liability and responsibility for use of this product.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

For human exposure, use appropriate personal protective equipment (PPE). Use appropriate personal protective equipment (PPE) to handle this product. PPE for the eyes and face: Chemical-resistant goggles or a face shield, preferably with a Class 1 lens, and suitable protective glasses that are impact resistant, puncture resistant, and have side shields. PPE for the hands: Chemical-resistant gloves, preferably with a Class 1 glove. PPE for the body: Long-sleeved shirt and long pants, and boots or chemical-resistant footwear. In all cases of overexposure, get medical attention immediately. Take person to a doctor or emergency treatment facility.

EXCESS PESTICIDE HANDLING:

If you have excess pesticide, contact the following agencies:

- Your State Pesticide or Environmental Control Agency
- Your Tribe Pesticide or Environmental Control Agency
- The Hazardous Waste Program, EPA, Pesticides or Toxics Branch (703-305-0669)
- State Health Department

IF THESE WASTES CANNOT BE DISPOSED OF BY USE ACCORDING TO LABEL INSTRUCTIONS, CONTACT YOUR STATE OR TRIBE, CONSULT THE AGENCY RESPONSIBLE FOR PESTICIDE REGULATION.

NOTES:

- For human exposure, use appropriate personal protective equipment (PPE). Use appropriate personal protective equipment (PPE) to handle this product. PPE for the eyes and face: Chemical-resistant goggles or a face shield, preferably with a Class 1 lens, and suitable protective glasses that are impact resistant, puncture resistant, and have side shields. PPE for the hands: Chemical-resistant gloves, preferably with a Class 1 glove. PPE for the body: Long-sleeved shirt and long pants, and boots or chemical-resistant footwear. In all cases of overexposure, get medical attention immediately. Take person to a doctor or emergency treatment facility.

- For all use, safety requirements and safety recommendations as set forth in the Directions for Use section for information about this standard.

- Before use, read all the label in detail. If you do not understand the label, ask someone to explain it to you in detail.

- While performing tasks with liquid contact potential, all handlers (including applicators) must wear: Chemical-resistant gloves, preferably with a Class 1 glove. PPE for the body: Long-sleeved shirt and long pants, and boots or chemical-resistant footwear. While performing tasks with liquid contact potential, all handlers (including applicators) must wear: Chemical-resistant gloves, preferably with a Class 1 glove. PPE for the body: Long-sleeved shirt and long pants, and boots or chemical-resistant footwear. In all cases of overexposure, get medical attention immediately. Take person to a doctor or emergency treatment facility.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Storage and Handling: Store in original containers. Keep in shade. Store in dark, cool, and dry areas. Work in a well-ventilated area. Personal Protective Equipment: Wear a self-contained breathing apparatus (SCBA) and protective clothing whenever applying this product. If fumigant is inhaled, remove person to fresh air. If on skin or in eyes, wash with soap and water. If swallowed, do not induce vomiting but give milk or water. Store in well-ventilated areas. Do not store near food or food containers. Do not use for any purpose other than that stated on the label.
PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

If swallowed: Give 1 to 2 glasses of water. Do not induce vomiting. If on skin: Wash skin with soap and water. If in eyes: Rinse eyes immediately with plenty of water for 15-20 minutes. If on clothing: Immediately remove contaminated clothing, shoes, and any other item on skin.

Inhalation Hazard

If inhaled:

• Remove person to fresh air. Keep warm.

Note: Contains methyl bromide, a substance which harms public health and environment by destroying ozone in the upper atmosphere.

TERR-O-GAS® 67

PREPARED SOIL FUMIGANT

INHALATION HAZARD

• Rinse skin immediately with plenty of water for 15-20 minutes.
• Immediately remove contaminated clothing, shoes, and any other item on skin.

If on clothing:

• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.

HAZARDS TO DOMESTIC OR WILD ANIMALS

Avoid all contact with domestic animals, birds, and wildlife. Do not contaminate water, food,hay, or crops.

HAZARDS TO DOMESTIC ANIMALS

Avoid all contact with domestic animals, birds, and wildlife. Do not contaminate water, food, hay, or crops.

STORAGE, HANDLING, AND DISPOSAL

Sellers of this product warrant that this product complies with all applicable state and local codes. Use this product in the manner prescribed by the label and applicable law.

Sellers of this product warrant that this product complies with all applicable state and local codes. Use this product in the manner prescribed by the label and applicable law.

STORAGE

• Do not store near axes, matches, flammable liquids, or other sources of ignition.
• Store in upright position, secured to a rack or wall to prevent tipping. Do not subject containers to rough handling or extreme temperature.

HANDLING

• Store cylinders out of the reach of children. Keep cylinders out of the reach of children. Keep cylinders out of the reach of children.
• Keep cylinders upright, secured to a rack or wall to prevent tipping. Do not subject containers to rough handling or extreme temperature.

DISPOSAL

• Do not use cylinders for any other purpose.
• Do not subject cylinders to rough handling or extreme temperature.
• Do not subject cylinders to rough handling or extreme temperature.
• Do not subject cylinders to rough handling or extreme temperature.

For sale to and use by Certified Applicators or persons under their direct supervision, and only for those uses covered by the Certified Applicator’s certification.

REstricted use pesticide due to acute toxicity

For sale to and use by Certified Applicators or persons under their direct supervision, and only for those uses covered by the Certified Applicator’s certification.

PERsonal protective equipment (PPE)

When performing tasks with liquid contact potential, all handlers (including applicators) must wear:

• Chemical-resistant footwear and socks.
• Chemical-resistant gloves.
• Protective clothing, goggles, apron, protective breathing apparatus, wet protective clothing, or steel hard hat wet protective clothing, or steel hard hat wet protective clothing, or steel hard hat wet protective clothing, or steel hard hat.

Environmental hazards

• Keep out of reach of children.
• Do not contaminate water, food, hay, or crops.

PHYSICAL AND CHEMICAL HAZARDS

• This product weighs 14.2 pounds per gallon.

In all cases of overexposure, get medical attention immediately. Take person to a doctor or emergency treatment facility.

SPILL AND LEAK PROCEDURES FOR SOIL FUMIGANT

In all cases of overexposure, get medical attention immediately. Take person to a doctor or emergency treatment facility.

This pesticide is toxic to mammals and birds. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters or rinsate.

This pesticide is toxic to mammals and birds. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters or rinsate.

In addition, when an air-purifying respirator is required, handlers (including applicators) must wear:

• Chemical-resistant gloves.
• Protective clothing, goggles, apron, protective breathing apparatus, wet protective clothing, or steel hard hat.

If inhaled:

• Do not wear jewelry, gloves, goggles, tight clothing, rubber protective clothing, or shoes;

HAZARD ZONE B

WARNING: Contains methyl bromide, a substance which harms public health and environment by destroying ozone in the upper atmosphere.

RESTRICTED USE PESTICIDE DUE TO ACUTE TOXICITY

For retail sale and use by Certified Applicators or persons under their direct supervision, and only for those uses covered by the Certified Applicator’s controlled area (see Certification and Registration). Not for sale or use to the general public. Use of this product is an activity associated with farming and thevall per this label. Always read and follow all label instructions carefully. Failure to follow all label instructions and other cautions may cause serious injury or death.

GENERAL PRECAUTIONS
- Always read and follow all label instructions carefully. Failure to follow all label instructions and other cautions may cause serious injury or death.
- Always use personal protective equipment (PPE) as directed on the label.
- Always wash hands and clothing thoroughly after handling or applying the product.
- Keep out of reach of children.
- Do not wear jewelry or gloves, go goggles, tight clothing, rubber protective clothing or rubber gloves, or any metal- or chemical-resistant aprons. For more options, follow the instructions permitted for routine handler tasks. Wear an SCBA and PPE required to detect devices, emergency procedures, and proper use of the fumigant.
- Use a respirator that is specifically marked with the fumigant’s name if you are supposed to be there. For applications permit®. Preventive measures to avoid inhalation are required on the label.
- Do not use chlorine dioxide or other disinfectants (such as hypochlorous acid) to wash the PPE, body, or clothing.
- Do not store the fumigant in an outdoor area. Store only in a cool and dry location.
- Do not use the fumigant in an area where there is no good ventilation.
- Do not wash original containers. Place in a sealed, tamper-evident container where there is good ventilation. This must be documented in the FMP.
- Do not enter the application area at any time that the following conditions exist:
- The handler is performing a handling task listed on this labeling – is not wearing prescribed PPE.
- The handler is exposed to irritants (e.g., acid rain, wind, or dust).
- The handler is performing a representative handling task.
- The handler is exposed to irritants.
- The handler is performing a handling task listed on this labeling at any time.
- The handler is exposed to irritants.
RESTRICTED USE PESTICIDE

DUE TO ACUTE TOXICITY

For retail sale and use by Certified Applicators or persons under their direct supervision, and only for those uses covered by the Certified Applicator’s certification.

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

For handling activities that take place after the fumigant has been delivered/ dispensed into the soil until the entry restricted period expires, the certifying person must complete the following tasks:

- 48 hours after tarp perforation is complete if tarps will not be removed and stored in such a manner that the fumigant will not be exposed to the environment. If tarps are removed from the application block, the emergency stop work triggers must be followed.
- 48 hours after tarp perforation is complete if tarps will not be removed and stored in such a manner that the fumigant will not be exposed to the environment. If tarps are removed from the application block, the emergency stop work triggers must be followed.
- 48 hours after tarp perforation is complete if tarps will not be removed and stored in such a manner that the fumigant will not be exposed to the environment. If tarps are removed from the application block, the emergency stop work triggers must be followed.
- 48 hours after tarp perforation is complete if tarps will not be removed and stored in such a manner that the fumigant will not be exposed to the environment. If tarps are removed from the application block, the emergency stop work triggers must be followed.
**TERI-OGAS 67**

**PESTICIDE USER GUIDE**

For the entry restricted period and notiﬁcation requirements, refer to the Fumigation Management Plan (FMP) for this product. The FMP is available online at the website of the Agricultural Regulatory Agency responsible for the application.

**SAFETY INFORMATION**

1. **Preparation for Application**
   - Perform the following activities before applying this product.
   - All handlers must be ﬁt-tested and wear approved air-purifying respirators before entering the application area.
   - Only start application after all handlers have been ﬁt-tested and provided with the appropriate equipment.

2. **Application**
   - All handlers must be wearing the appropriate air-purifying respirator and cartridges available. These handlers must be provided with documentation demonstrating how they have complied with the label and procedures described in the FMP.

3. **Post Application**
   - After application, all handlers must be provided with documentation demonstrating how they have complied with the label and procedures described in the FMP.

**LIMITED USE PESTICIDE**

This product is regulated by the Environmental Protection Agency (EPA) for limited use only. It is not for general use and its use is limited to agricultural activities, such as those listed in the FMP.

**REGULATIONS**

1. **Regulatory Agency**
   - The following agencies have jurisdiction over the application of this product.
   - The state or local agricultural regulatory agency or the agricultural regulatory agency of the state or local government having jurisdiction over the application of this product.

2. **Permit Requirements**
   - The following permits are required for the application of this product.
   - An application permit from Agricultural Regulatory Agencies as required.

**AIR-PURIFYING RESPIRATOR AVAILABILITY**

- During the collection of air samples or on any respirator monitoring equipment, the air-purifying respirator must be worn on an unconscious handler until an appropriate respirator can be placed on the handler.

**FUMIGANT REMOVAL**

- Removal of the tarp from the application area is the ﬁnal step in the process of removing the fumigant from the soil.

**SAFETY DEVICES**

- A full-face air-purifying respirator must be worn by the handler when performing a handling task as stated in this label.

**TRAINING**

- The employer of any handler must conﬁrm that each handler has been trained on the use of the product and is able to perform the required tasks.

**NOTICE TO PHYSICIAN**

- All handlers must be ﬁt-tested and wear approved air-purifying respirators before entering the application area.

**TERI-THERM**

**Mr. Matthias Brandt**

**Chemicals**

**2650.0/684.0**

**NOTE TO PHYSICIAN**

**TERI-THERM**

**Mr. Matthias Brandt**

**Chemicals**

**2650.0/684.0**

**The product includes:**

- **Personal Protective Equipment (PPE):**
  - Respiratory Protection (Air-purifying Respirator) with cartridges:
    - High Efficiency Particulate (HEPA) Filters
    - Organic Vapor Type-C Innovator
    - Particulate Filter Type-A Innovator
    - P100 Cartridges

- **Other Requirements:**
  - Follow the label and procedures described in the FMP.
  - Use the appropriate respirator and cartridges available.

SIPPS AND LEAK PROOFS FOR SOLAR FERTILIZATION

For use in a system of a supercapacitor system or solar irrigation, use a low-cost, low energy solar water heater. The system can be used to recover a significant amount of energy, and to recover electrical power. The system can also be used to recover electrical power from the sun. The system can also be used to recover electrical power from the sun. The system can also be used to recover electrical power from the sun. The system can also be used to recover electrical power from the sun.

SPLA100-220 Application Rates for Quarantine uses

Quarantine uses do not have a reportable quantity threshold. Limitations include but are not limited to: 

1. The limits are based on the regulations of the Department of Agriculture (USDA) or the Environmental Protection Agency (EPA).
2. The limits are based on the regulations of the Department of Agriculture (USDA) or the Environmental Protection Agency (EPA).
3. The limits are based on the regulations of the Department of Agriculture (USDA) or the Environmental Protection Agency (EPA).
4. The limits are based on the regulations of the Department of Agriculture (USDA) or the Environmental Protection Agency (EPA).
5. The limits are based on the regulations of the Department of Agriculture (USDA) or the Environmental Protection Agency (EPA).

This product may be used as part of a quarantine program as described in Table 1. The use of pesticides, however, may also be regulated by the Environmental Protection Agency (EPA). To avoid potential human exposure, keep pesticides out of the reach of children. Do not use pesticides that have been exposed to the sun. Do not use pesticides that have been exposed to the sun. Do not use pesticides that have been exposed to the sun. Do not use pesticides that have been exposed to the sun. Do not use pesticides that have been exposed to the sun. Do not use pesticides that have been exposed to the sun.
Soils and Watershed, HandiPal, and Disposal

Fusarium
• Plant-parasitic nematodes, including root-knot, root lesion (meadow), cyst, citrus, burrowing, false root-knot, lance, spiral, ring, sting, stubby root, and other weevils. Typically found in soil at time of treatment:

• Weeds, including broadleaf weeds such as broomrape and lambsquarters

• Pests controlled when present in soil at time of treatment:

• Pathogens such as Fusarium that cause root rot and/or stunt growth in crops

• Inversion conditions (e.g., shallow, compressed (low-level)

• EDDA-FeNH₄ is a chelating agent that allows for use of methyl bromide under conditions where conventional methyl bromide use would be restricted (e.g., due to the presence of listed crops with critical use exemptions). EDDA-FeNH₄ is a fumigant, and should not be confused with a chelating agent. EDDA-FeNH₄ is intended for use as a seed treatment for certain crops, as described on the label.

• EDDA-FeNH₄ is a product of Dow AgroSciences, and is not intended for use as a soil fumigant or as a soil amendment.

• EDDA-FeNH₄ is used as a seed treatment to reduce susceptibility to certain pathogens, including Pythium and Fusarium, in select vegetable and ornamental crops.

• EDDA-FeNH₄ is not intended for use on crops that have critical use exemptions.

• EDDA-FeNH₄ is a product of Dow AgroSciences, and is not intended for use as a soil fumigant or as a soil amendment.

• EDDA-FeNH₄ is used as a seed treatment to reduce susceptibility to certain pathogens, including Pythium and Fusarium, in select vegetable and ornamental crops.

• EDDA-FeNH₄ is not intended for use on crops that have critical use exemptions.

• EDDA-FeNH₄ is a product of Dow AgroSciences, and is not intended for use as a soil fumigant or as a soil amendment.

• EDDA-FeNH₄ is used as a seed treatment to reduce susceptibility to certain pathogens, including Pythium and Fusarium, in select vegetable and ornamental crops.

• EDDA-FeNH₄ is not intended for use on crops that have critical use exemptions.

• EDDA-FeNH₄ is a product of Dow AgroSciences, and is not intended for use as a soil fumigant or as a soil amendment.

• EDDA-FeNH₄ is used as a seed treatment to reduce susceptibility to certain pathogens, including Pythium and Fusarium, in select vegetable and ornamental crops.

• EDDA-FeNH₄ is not intended for use on crops that have critical use exemptions.
For residue prior to fumigation is important to limit the natural "chimneys" that allow air to escape. Little or no crop residue shall be present on the soil surface. Crop residue reduces the fumigant moisture content of the area to be treated, a local extension service agent, or fumigant supplier. The fumigant will be reduced. Previous and/or local experience with the soil to be treated will be necessary. The USDA Feel and Appearance Method is the most common method used to determine soil moisture content. The moisture needed in this zone will vary according to soil type and must be established by a local extension service agent. For soil moisture adjusted. If irrigation is not available and there is no water within 200 feet of the site, injection equipment must be used. To be effective, the soil must be worked properly. Proper calibration is essential for application rates. Slowly open the compressed gas or compressed air valve, and increase the pressure in the compressed gas cylinder or compressed air system before opening the fumigant cylinder valve. If a compressed gas cylinder is used, make sure that positive check valves between the compressed gas cylinder or compressed air cylinder and the water must be injected at a sufficient depth to provide a fumigant cylinder to prevent drift. The fumigant must be under pressure. The injection equipment must be set to inject Inject Terr-O-Gas® 67 with a chisel type applicator having chisels 80°F at the depth of application. Follow applicable GAP soil preparation requirements. The soil surface must be covered with a suitable tarp (and after tarps are perforated and removed), disc or plow the soil to help prevent drift. The soil must be sealed. The injection equipment must be set to inject a specified percentage of the tarp is used. • Tarp information and procedures for repair, perforation and removal (if no tarp is used). • Monitoring equipment to be used and timing of monitoring procedures. Other factors used to determine when tarp repair will be conducted. Minimum time following application that tarp will be repaired. Must be in accordance with those established by the USDA-APHIS Plant Health Service. Spill Prevention and Land Use Restrictions for Soil Fumigants. This product may be used at any crop or non-crop applicator. • Monitoring equipment to be used and timing of monitoring procedures. Other factors used to determine when tarp repair will be conducted. Spill Prevention and Land Use Restrictions for Soil Fumigants. This product may be used at any crop or non-crop applicator. Studying the effects of various levels of rhizoctonia strain inoculum on the crop, the authors concluded that a root surface treatment could be effective. The results of this study indicate that the product can be used as an effective control of Rhizoctonia and Pyrenochaeta in tomato. However, further research is needed to determine the effectiveness of this product in other crops.
