

Title 3, California Code of Regulations, Section 6447(e) requires that tarpaulins used for methyl bromide soil fumigations in California shall have a permeability factor between 5 and 8 milliliters per hour per square meter per 1000 ppm of methyl bromide at 30 degrees Celsius and be approved by the Department.

Questions and requests for tarpaulin approval should be submitted to:

Mr. Randy Segawa Department of Pesticide Regulation 1001 I Street Sacramento, California 95814 Phone: (916) 324-4137 Fax: (916) 324-4088 rsegawa@cdpr.ca.gov

The following laboratories have tested tarpaulins for methyl bromide permeability.

Bolsa Research Associates PO Box 37 Hollister, California 95024 831-637-9776

National Testing Standards 877 South Rose Place Anaheim, California 92805 714-991-5520

The following tarpaulins meet the Department of Pesticide Regulation's permeability requirement for methyl bromide fumigation in California and are approved for use under the regulations. The mention of commercial products or services, their source, or their use is not to be construed as either an actual or implied endorsement of such product or service.
