Pilot Project

Dear Randy and Mark,

This is a follow up to the discussion of the pilot project at the December 3, 2004 Pest Management Advisory Committee Meeting.

If at all possible, it would be beneficial to include particulates -- particularly as they relate to PM 10 regulations -- in the air sampling. Hopefully, Barry Wilson and the Environmental Toxicology infrastructure at UC Davis can share with you how this can be accomplished without too much complexity.

Bob Curtis
Member, Pest Management Advisory Committee
