

**DEPARTMENT OF PESTICIDE REGULATION
LICENSING AND CERTIFICATION PROGRAM
CONTINUING EDUCATION WORKSHOP**

The Department of Pesticide Regulation (DPR) has thus far held two workshops for providers of continuing education and interested stakeholders, in order to solicit ideas and comments regarding proposed changes to California Code of Regulation, Section 6513, located at the following link: <http://www.cdpr.ca.gov/docs/legbills/calcode/subchpte.htm#0301> .

The changes will add a requirement for reporting to DPR the same information that providers are currently required to maintain, as well as the course completion date. These changes are a necessary consequence of providing the convenience of on-line renewal to our licensees and certificates holders.

The Workshop materials included a summary of the rationale for the changes, examples of the DPR web page changes that will simplify the transition and a copy of the draft language (attached here). Time, date and location for future workshops will be posted when they are scheduled.
