PUBLIC REPORT

SUBJECT:

Proposed registration affecting the above listed products.

DESCRIPTION OF PROPOSED ACTION:

The Director of Pesticide Regulation proposes to register the products listed above pursuant to Chapter 2 of Division 7 (beginning with Section 12751 of the Food and Agriculture Code) after Month Day, Year. Comments concerning this proposed action may be directed to the Department of Pesticide Regulation's Pesticide Registration Branch until that date.

As a result of scientific evaluation, it has been determined that no direct or indirect significant adverse environmental impact is anticipated from the registration of the above listed products; therefore, no public report on the individual products will be filed.

ALTERNATIVES:

An effective integrated pest management strategy requires the flexibility of a large number of comparable, but not exactly equivalent, pesticides. A detailed alternatives analysis involving all anticipated crop and pest uses, under many environmental conditions and cultural practices, is beyond the scope of the normal evaluation process when no significant adverse environmental impact, which cannot be mitigated, is anticipated. Such analyses are more appropriate where more specific conditions apply, such as at the user level or, in the case of restricted materials, at the level of the county agricultural commissioner. For a specified situation there may be few or no alternatives.

In the present case, in the absence of an identified significant potential adverse impact, the benefit arising from pest management flexibility is determined to justify this registration.

NOTICE OF FINAL DECISIONS TO REGISTER PESTICIDE PRODUCTS AND WRITTEN EVALUATION

Pursuant to section 6255 (Title 3) of the California Code of Regulations, the Director of the Department of Pesticide Regulation, files this Notice concerning pesticide products with the Secretary of the Resources Agency for posting. For products conditionally registered, the Director found that the use of the products during the period(s) while the data are being developed is not expected to cause any significant adverse effect on the environment, there is a clear need for the products in California while the data are being developed, and that the benefits of using the products outweigh risks to human health and the environment. This Notice must remain posted for a period of 30 days for public inspection. Contacts regarding this notice should be made to the Department of Pesticide Regulation's Pesticide Registration Branch at (916) 445-4400.

WRITTEN EVALUATION: RESPONSE TO COMMENTS RAISING SIGNIFICANT ENVIRONMENTAL POINTS

Pursuant to Title 3 California Code of Regulations (CCR) section 6254, this Notice includes a written evaluation of significant environmental points raised in comments submitted pursuant to Title 3 CCR section 6253 for any of the products listed above. The Department of Pesticide Regulation (DPR) received one comment raising environmental points from the Bay Area Clean Water Agencies (BACWA) in response to DPR's March 23, 2012, posting of a proposed decision to register Sanosil International, LLC's product, Sanosil S25, US EPA Registration No. 84526-3, containing hydrogen peroxide and metallic silver.

COMMENT: The commenter requested DPR to route this registration submission to DPR's Environmental Monitoring Branch's Surface Water Evaluation Group for evaluation of silver potentially entering wastewater.

RESPONSE: In response to the commenter's request, the submission was routed to DPR's Surface Water Protection Program. The language on the product label states, "Do not discharge effluent containing this product into lakes, streams, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewer systems without previously notifying the local sewage treatment plant authority." Based on the label wording, DPR does not expect significant adverse environmental impacts to result with this product's use. DPR is proceeding with the registration of the above listed product.
