PUBLIC REPORT

SUBJECT:

Proposed registration affecting the above listed products.

DESCRIPTION OF PROPOSED ACTION:

The Director of Pesticide Regulation proposes to register the products listed above pursuant to Chapter 2 of Division 7 (beginning with Section 12751 of the Food and Agriculture Code) after November 11, 2012. Comments concerning this proposed action may be directed to the Department of Pesticide Regulation's Pesticide Registration Branch until that date.

As a result of scientific evaluation, it has been determined that no direct or indirect significant adverse environmental impact is anticipated from the registration of the above listed products; therefore, no public report on the individual products will be filed.

ALTERNATIVES:

An effective integrated pest management strategy requires the flexibility of a large number of comparable, but not exactly equivalent, pesticides. A detailed alternatives analysis involving all anticipated crop and pest uses, under many environmental conditions and cultural practices, is beyond the scope of the normal evaluation process when no significant adverse environmental impact, which cannot be mitigated, is anticipated. Such analyses are more appropriate where more specific conditions apply, such as at the user level or, in the case of restricted materials, at the level of the county agricultural commissioner. For a specified situation there may be few or no alternatives.

In the present case, in the absence of an identified significant potential adverse impact, the benefit arising from pest management flexibility is determined to justify this registration.

NOTICE OF FINAL DECISIONS TO REGISTER PESTICIDE PRODUCTS

Pursuant to section 6255 (Title 3) of the California Code of Regulations, the Director of the Department of Pesticide Regulation, files this Notice concerning pesticide products with the Secretary of the Resources Agency for posting. For products conditionally registered, the Director found that the use of the products during the period(s) while the data are being developed is not expected to cause any significant adverse effect on the environment, there is a clear need for the products in California while the data are being developed, and that the benefits of using the products outweigh risks to human health and the environment. This Notice must remain posted for a period of 30 days for public inspection. Contacts regarding this notice should be made to the Department of Pesticide Regulation's Pesticide Registration Branch at (916) 445-4400.
