NOTICE OF COMPLETION OF DIETARY RISK ASSESSMENT
FOR THE ACTIVE INGREDIENT
ORTHO-PHENYLPHENOL (OPP) AND SODIUM ORTHO-PHENYLPHENATE (SOPP)

The Department of Pesticide Regulation (DPR) has completed a human health risk assessment involving all pesticide products registered in California containing ortho-phenylphenol (OPP) and sodium ortho-phenylphenate (SOPP).

Enclosed is a copy of the final Risk Characterization Document (RCD) for dietary exposure for the active ingredients OPP and SOPP. Using current toxicity data, DPR determined that the calculated margins of safety are greater than values conventionally considered to be protective of human health. Therefore, no mitigation measures are needed for pesticide products containing OPP and SOPP.

Please address all requests for additional information to Ms. Anne Downs, Program Specialist, Pesticide Registration Branch, by e-mail at adowns@cdpr.ca.gov or by telephone at 916.324.3535.
