

Do I Need a License or Certificate to Apply Pesticides on Cannabis?

You do not need a license or certificate to apply pesticides if:

- ✓ **You are only applying non-restricted pesticides to your own property or your employer's property**

Example: You were hired as a cultivator which requires some pesticide use.

Note: You do not need a license or certificate to apply non-restricted pesticides on your employer's property, but you do need to complete pesticide handler training annually.

You need a license to apply pesticides on cannabis if:

- ✓ **Your business performs pest control services for hire on cannabis**
