Restricted Materials and Permitting – Table of Contents

Pesticide Use Enforcement Program Standards Compendium Overview ..................................................1
Mission ..................................................................................................................................................1
Role ...................................................................................................................................................1
About the Pesticide Use Enforcement Program Standards Compendium ..............................................1
Description of Each of the Compendium’s Eight Volumes ..................................................................2

Chapter 1 – California’s Restricted Materials Permitting Program

Chapter 2 – Restricted Use Pesticides and Restricted Materials

Chapter 3 – Environmental Impact Report Functional Equivalency
Overview ..................................................................................................................................................3-1
Section 3.1: History of the Pesticide Regulatory Program’s Environmental Impact Report
Functional Equivalency .......................................................................................................................3-2
Section 3.2: How Requirements of Public Resources Code section 21080.5 are Addressed by the Program ..........................................................................................................................3-7
Section 3.3: Specific Procedural Requirements of Public Resources Code section 21080.5 .............3-10
Section 3.4: Scope of Certified Activities ...........................................................................................3-16

Chapter 4 – Private Applicator Certification

Chapter 5 – Permits and Exemptions

Chapter 6 – Permit Requirements
Overview ..................................................................................................................................................6-1
Section 6.1: General Permit Requirements ..........................................................................................6-2
Section 6.2: Agricultural Use Restricted Materials Permit Requirements ..........................................6-6
Section 6.3: Non-Agricultural Use Restricted Materials Permit Requirements .................................6-9
Section 6.4: Amending the Restricted Materials Permit ......................................................................6-11

Chapter 7 – Permit Evaluations
Overview ..................................................................................................................................................7-1
Section 7.1: EIR Functional Equivalency Evaluation Requirements .....................................................7-2
Section 7.2: Evaluating the Permit ......................................................................................................7-8
Section 7.3: Reviewing and Evaluating the Notice of Intent .................................................................7-12

Chapter 8 – (Pre-Application) Site Evaluations

Chapter 9 – Grounds for Refusal, Revocation, and Suspension

# Restricted Materials and Permitting – Table of Contents, Continued

**Chapter 10 – Due Process Related To Permits**  
Overview ........................................................................................................... 10-1  
Section 10.1: Due Process: When FAC section 11512.5 Procedures Apply .......... 10-2  
Section 10.2: Due Process Procedures under FAC section 11512.5 .................... 10-5

**Chapter 11 – Interested Party Permit Review Request**

**Chapter 12 – Appeals to the Director for Additional Review**  
Overview ........................................................................................................... 12-1  
Section 12.1: Appeal to the Director by Permittees – FAC section 11512.5 .......... 12-2  
Section 12.2: Appeal to the Director by Others – FAC section 14009(b) Implemented by 3 CCR section 6442 ................................................................. 12-3

**Appendix A – Glossary**  
Overview ........................................................................................................... A-1  
Section A.1: Acronyms ...................................................................................... A-2  
Section A.2: Definitions .................................................................................... A-3  
Section A.3: Web Resources ............................................................................. A-7

**Appendix B – California Restricted Materials Requirements**  
Overview ........................................................................................................... B-1  
Section B.1: California Restricted Materials Requirements ................................. B-3  
Section B.2: Requisitos Para Materiales Restringidos en California .................. B-5

**Appendix C – General Drift Minimization**

**Appendix D – Recommended Permit Conditions for Rice Pesticides**  
Overview ........................................................................................................... D-1  
Section D.1: Instructions to County Agricultural Commissioners on Rice Pesticide Permit Issuance ................................................................. D-2  
Section D.2: Data Reporting Guidelines for the Rice Pesticide Program .............. D-10  
Section D.3: General Water-Holding ................................................................. D-13  
Section D.4: Phenoxy/Dicamba Herbicides ......................................................... D-14  
Section D.5: Thiobencarb .................................................................................. D-17

**Appendix E – Ground Water Protection Approved Alternative Management Practices**

**Appendix F – Tribufos (DEF, Folex) Recommended Permit Conditions**

---

*Continued on next page*
Appendix G – Commodity Fumigation
Overview......................................................................................................................... G-1
Section G.1: Recommended Permit Conditions for Methyl Bromide and Sulfuryl Fluoride Commodity Fumigation................................................................................... G-2
Section G.2: Recommended Permit Conditions for Tarped Potting Soil Fumigation....... G-7

Appendix H – Aluminum and Magnesium Phosphide for Burrowing Rodent Control Recommended Permit Conditions

Appendix I – Methyl Bromide Recommended Permit Conditions for Soil Fumigation within a Greenhouse

Appendix J – 1,3-Dichloropropene (Field Fumigant) Recommended Permit Conditions
Overview ....................................................................................................................... J-1
Section J.1: Background on Use Limitations................................................................. J-3
Section J.2: Conditions for All Application Methods................................................... J-4
Section J.3: Tables ....................................................................................................... J-6

Appendix K – Chloropicrin and Chloropicrin in Combination with Other Products (Field Fumigant) Recommended Permit Conditions
Overview ..................................................................................................................... K-1
General application information ................................................................................. K-3
Buffer zones for chloropicrin-only products and chloropicrin/1,3-D combinations .... K-6
Buffer zones for methyl bromide and chloropicrin combinations................................ K-7
Minimum buffer zone distances ............................................................................... K-14
Tree hole limitations ................................................................................................. K-15
Overlapping buffer zones........................................................................................ K-16
Tarp perforation and removal .................................................................................. K-22
Emergency preparedness and response measures.................................................... K-22
Emergency response plan ....................................................................................... K-22
Buffer zone tables .................................................................................................... K-23

Appendix L – Metam Sodium, Metam Potassium, and Dazomet Field Soil Fumigation Recommended Permit Conditions
Overview ..................................................................................................................... L-1
Application Method 1: Dazomet Field Soil Fumigation Recommended Permit Conditions
Application Method 2: Metam Sodium and Metam Potassium Field Soil Fumigation Recommended Permit Conditions for Drench Applications

Continued on next page
### Appendix L – Metam Sodium, Metam Potassium, and Dazomet Field Soil Fumigation Recommended Permit Conditions, Continued

Application Method 3: Metam Sodium and Metam Potassium Field Soil Fumigation
- Recommended Permit Conditions for Drip Applications
Application Method 4: Metam Sodium and Metam Potassium Field Soil Fumigation
- Recommended Permit Conditions for Flood Applications
Application Method 5: Metam Sodium and Metam Potassium Field Soil Fumigation
- Recommended Permit Conditions for Power Mulcher and Rotary Tiller (Rototiller) Applications
Application Method 6: Metam Sodium and Metam Potassium Field Soil Fumigation
- Recommended Permit Conditions for Rod Bar Applications
Application Method 7: Metam Sodium and Metam Potassium Field Soil Fumigation
- Recommended Permit Conditions for Shank Applications
Application Method 8: Metam Sodium and Metam Potassium Field Soil Fumigation
- Recommended Permit Conditions for Power Mulcher and Rotary Tiller (Rototiller) Applications
Application Method 9: Metam Sodium and Metam Potassium Field Soil Fumigation
- Recommended Permit Conditions for Sprinkler Applications

### Appendix M – Methyl Bromide Field Fumigation Recommended Permit Conditions

### Appendix N – Volatile Organic Compounds

Overview.................................................................................................................................. N-1
Section N.1: Federal Nonattainment Areas Affected by California Regulations to Reduce Emissions from Fumigant Pesticides............................................................... N-3
Section N.2: Field Fumigation Methods Allowed, by Geographic Area................................. N-5

### Appendix O – Chlorpyrifos Interim Recommended Permit Conditions

(Rev. 8-2018)
