

University of California, Davis
Pest Management Systems and Methods

Course Name
Advanced Biological Control
Agriculture and the Environment
Arthropod Pest Management
Biology and Management of Aquatic Plants
Concepts in Integrated Pest Management
Concepts in Pest Management
General Entomology
Grapevine Pests, Diseases, and Disorders
Insect Nematology and Biological Control
Introduction to Biological Control
Introduction to Sustainable Agriculture
Management of Plant-Parasitic Nematodes
Molecular Biology of Insects & Insect Viruses
Organic Crop Production Practices
Pest Control Practices
Sustainability and Agroecosystem Management
Weed Science
