California Notice 2015-07

NOTICE OF COMPLETION OF ADDENDUM
TO COMPREHENSIVE HUMAN HEALTH RISK ASSESSMENT
FOR THE ACTIVE INGREDIENT
DELTAMETHRIN

The Department of Pesticide Regulation (DPR) has completed an addendum to the comprehensive human health risk assessment for the active ingredient deltamethrin. The addendum considers new use patterns, exposure scenarios, and data since the June 2000 risk characterization document (RCD) and December 1996 exposure assessment document (EAD) were completed. The addendum, as well as the RCD and EAD, are available at <http://www.cdpr.ca.gov/docs/risk/rcd.htm>.

DPR will issue a risk management directive (RMD) if there are exposure scenarios of concern that require mitigation. If an RMD is issued, a public notice with a link to the RMD will be released and posted on DPR's Web site at <http://www.cdpr.ca.gov/docs/registration/canot/camenu.htm>.

Since new uses or discoveries concerning the active ingredient may change the risk potential at any time, the risk assessment may be subject to revisions in the future.

Please address all questions pertaining to the deltamethrin risk assessment to Ms. Ann Hanger, Senior Environmental Scientist (Specialist), Pesticide Registration Branch, by telephone at 916-324-3535 or by e-mail at Ann.Hanger@cdpr.ca.gov.
