NOTICE OF PROPOSED DECISION TO RENEW
PESTICIDE PRODUCT REGISTRATIONS FOR 2017,
DIRECTOR’S FINDING AND PUBLIC REPORT

In accordance with Title 3 of the California Code of Regulations (CCR) section 6253, the Director of the Department of Pesticide Regulation (DPR) issues this notice and public report of his proposed decision to renew, for the calendar year 2017, Certificates of Registration of those pesticide products registered with DPR on December 31, 2016.

Comments concerning this proposed decision must be submitted no later than December 7, 2016, and be directed to the following address:

Pesticide Registration Branch
Department of Pesticide Regulation
P. O. Box 4015
Sacramento, California 95812-4015

Contact regarding this notice can be made to the Pesticide Registration Branch at 916-445-4400.

DESCRIPTION OF THE ACTION

This is a proposed decision to renew certificates of registration of pesticide products registered with DPR on December 31, 2016. The pesticide products proposed for renewal are currently registered in California. The registrants of these products are required to renew their certificates of registration for their respective products in California for the year 2017.

The annual renewal of certificates of registration is a non-discretionary duty that must be taken if certain requirements, as described in the regulatory framework below, are satisfied by the registrant. Pesticides proposed for registration renewal under this notice can be found in a DPR database online at <http://www.cdpr.ca.gov/docs/label/labelque.htm>. There are approximately 13,848 registered pesticide products in this database.
REGULATORY FRAMEWORK

DPR endeavors to eliminate from use any pesticide product that endangers the environment or is not beneficial for the purpose for which it was sold or is misrepresented. Before a substance is initially registered as a pesticide, DPR conducts a thorough and timely evaluation [California Food and Agricultural Code (FAC) section 12824]. Once a pesticide is registered, it is subject to an orderly program of continuous reevaluation as set forth in regulation (FAC section 12824 and 3 CCR section 6220-6226).

Pesticide registrations expire on December 31 of the year in which they are issued, and a registrant must submit a renewal application and fee within one month of the December 31 expiration date (FAC section 12817). A completed renewal application includes a certification by the registrant that any factual or scientific evidence of an adverse effect or risk of the pesticide to human health or the environment has been submitted to DPR (3 CCR section 6210). Therefore, upon the receipt of a complete and timely application, DPR is required to renew each pesticide registration within sixty (60) days, except when the Director, after hearing, has cancelled the registration or denied the application to register the pesticide product (FAC section 12816, 12825, and 12827 and 3 CCR 6215b).

At any time, DPR may conduct a reevaluation of a registered pesticide based on information derived from various sources, including public and private research studies, consultation with the Pesticide Registration and Evaluation Committee and the U.S. Environmental Protection Agency, adverse effects disclosures, and public comments. DPR must investigate reports and information received that indicates a pesticide may have caused, or is likely to cause, a significant adverse impact or that indicates there is an alternative to the product that may significantly reduce an adverse environmental impact (3 CCR section 6220). If the Director finds, from the investigation, a significant adverse impact has occurred, is likely to occur, or such an alternative is available, the pesticide involved must be reevaluated (3 CCR section 6220). Information regarding ongoing reevaluations can be found on DPR’s Web site located at <http://cdpr.ca.gov/docs/registration/reevaluation/reevals.htm>.

The initiation of a reevaluation is subject to a public notice and comment period, and a public semiannual report requirement. At the conclusion of a reevaluation, DPR must determine one of the following: no significant adverse impact found; additional restrictions on use are necessary; or, cancellation of pesticide products. DPR posts proposed and final reevaluation decisions and semiannual reports on pesticide products reevaluated, under reevaluation, or for which factual information has been received to consider reevaluation at <http://www.cdpr.ca.gov/docs/registration/canot/camenu.htm>. However, regardless of reevaluation status or outcome, DPR must renew a product unless the Director, after hearing, has cancelled the pesticide product. If DPR determines continued use of a product has a significant adverse effect that cannot be mitigated, DPR must still renew, but may initiate the cancellation process with the option to suspend the registration pending cancellation, if the product’s use constitutes an immediate and substantial danger to persons or the environment (FAC section 12825 and 12826).
DIRECTOR’S FINDINGS

At this point in time, the Director finds, for all pesticide products proposed for renewal that are not currently under reevaluation and are not under consideration for reevaluation, sufficient information has not been received necessitating the reevaluation or initiation of the cancellation process. This proposed action to renew certificates of registration of pesticide products currently registered in California maintains the status quo and will not cause either a direct or a reasonably foreseeable indirect physical change in the environment that constitutes a significant adverse environmental effect, and as a result, no alternatives or mitigation measures are proposed.

Based on the findings made above, the Director determines the renewal of pesticide product registrations for the calendar year 2017 should proceed in accordance with the applicable laws and regulations and no additional products need to be placed into reevaluation or the cancellation process initiated.

CONTINUOUS EVALUATION

All products proposed for registration renewal are subject to a continuous evaluation under FAC section 12824 to identify and evaluate any potential significant adverse environmental impact that may be indicated after the initial registration or renewal. Following the process outlined in 3 CCR section 6220 through 6224, or at any time a significant adverse effect is identified that cannot be mitigated, action may be taken to cancel the registration under FAC section 12825.
