

California Notice 2020-06

NOTICE OF COMPLETION OF ADDENDUM TO THE
RISK CHARACTERIZATION DOCUMENT
FOR THE ACTIVE INGREDIENT
SULFURYL FLUORIDE

The Department of Pesticide Regulation (DPR) has completed an addendum to the September 2006 risk characterization document for the active ingredient sulfuryl fluoride. The final addendum is available at <https://www.cdpr.ca.gov/docs/whs/active_ingredient/sulfuryl-fluoride.htm> under the “Risk Assessment Documents” tab.

Since new uses or discoveries concerning the active ingredient may change the risk potential at any time, DPR’s risk assessment may be subject to revisions in the future to account for any new information or relevant data.

DPR will issue a risk management directive (RMD) if there are exposure scenarios of concern identified by the addendum that require mitigation. If DPR issues an RMD, it will be available at <https://www.cdpr.ca.gov/docs/whs/active_ingredient/sulfuryl-fluoride.htm> under the “Mitigation Documents” tab.

Please address all questions pertaining to this addendum to Ms. Kara James, Environmental Scientist, at 916-324-3523 or by e-mail at <Kara.James@cdpr.ca.gov>.
