

## Attachment: Nonagricultural Outdoor Neonicotinoid Products by Registrant

As of April 3, 2026, 96 pesticide products containing the active ingredients acetamiprid, clothianidin, dinotefuran, imidacloprid, or thiamethoxam are registered with non-agricultural uses on non-production outdoor ornamental plants, trees, or turf in California. DPR determined the 96 products listed below are subject to the decision to initiate reevaluation in accordance with the statutes of Assembly Bill 363 which amended FAC Section 12838.

Products are listed alphabetically by registrant name. If a product was only recently registered or the product is not currently registered, it may not appear on the list below. Products that were inactivated due to nonrenewal may be reactivated at any time within the same calendar year.
