

2023 VOC Inventory Report Comment Responses

Comments	Response	Action
<p>Comment 1:</p> <p>After reviewing the Draft Annual VOC Emissions Report, I respectfully request the following: Localized data for EL Rio.</p>	<p>Thank you for your response to DPR's 2023 VOC Inventory report. Regulation 3CCR section 6881 requires DPR to calculate VOC emissions in five federally designated nonattainment areas (composed of 1 or more counties) during the ozone season (May 1st to October 31st). This annual report is part of a larger overview of emissions as per DPR's commitment to the State implementation Plan regarding ozone.</p> <p>The request for localized data for El Rio, protective measures for residential zones, and inclusion in Environmental Justice Efforts is outside the scope of the 2023 VOC inventory report.</p>	<p>No further action necessary.</p>
<p>Comment 2:</p> <p>An attachment for CleanEarth4kids.org outlining the harms of synthetic pesticides and requesting DPR to stop all uses of synthetic pesticides and increase support for organic farming practices.</p>	<p>Thank you for your response to DPR's 2023 VOC Inventory report. We have acknowledged your flyer and appreciate your feedback.</p>	<p>No further action necessary.</p>
