

Attachment: Total Release Fogger Products by Registrant

As of June 29, 2026, 45 total release fogger pesticide products intended for indoor consumer use were registered for sale and use in California containing one or more of the following active ingredients: cyfluthrin, cypermethrin, esfenvalerate, etofenprox, etoxazole, n-octyl bicycloheptene dicarboximide, permethrin, piperonyl butoxide, pyrethrins, pyriproxyfen, s-methoprene, or tetramethrin. DPR determined the 45 products listed below are subject to the total release fogger reevaluation based on their potential to adversely impact human health.

Products are listed alphabetically by registrant name. If a product was recently registered or the product is not currently registered, it may not appear on the list below. Products that were inactivated due to nonrenewal may be reactivated at any time within the same calendar year.
