# Category 2 Potential Priorities

1. Cyhalothrins (gamma-, lambda-)
2. Dichlorvos*/Naled* (Grouped together as naled rapidly degrades to dichlorovos)
3. Fluopyram
4. Malathion*
5. Methyl bromide
6. Organophosphates as a class (*15 total including Dichlorovos, Naled, Malathion)
    - Acephate
    - Bensulide
    - Chlorpyrifos
    - Coumaphos
    - Diazinon
    - Dichlorvos
    - Dimethoate
    - Ethoprop
    - Fosthiazate
    - Malathion
    - Naled
    - Phorate
    - Phosmet
    - Tetrachlorvinphos
    - Tribufos

All active ingredients (AIs) included for discussion have been ranked in the top 6 through DPR's Human Health Assessment Prioritization screening tool. Fipronil and thiamethoxam are the only other AIs in top 6 ranks that are not included as Category 2 Potential Priorities for SPARC consideration since both are current priorities for DPR action.
