

Information

Data from January 1, 2026 to June 30, 2026. Updated on July 31 2026.

Section 6626(g) in Title 3 of the California Code of Regulations requires expedited Pesticide Use Reporting for the fumigant 1,3-Dichloropropene (1,3-D; Telone) beginning in 2024. "The Department shall post a summary of 1,3-Dichloropropene pesticide use report data, including summary data by county, township, month, crop, and fumigaon method, on its web site. The available summary data shall be posted at least quarterly by the last day of the first month in the following quarter (e.g., data for January–March shall be posted by April 30)."

How to use the 1,3-D Dashboard:

Select the tab of interest.

Interact with data using filters.

Pesticide use data are preliminary and may change based on corrections or additional reports submitted. PUR records can be updated for various reasons, including miscalculations of application rates or treated acreage, missing commodity information, or combinations of multiple applications into a single PUR record.

DPR reviews pesticide use data and works closely with county agricultural commissioners to address potential reporting issues in order to comply with restrictions introduced through the 2024 1,3 D regulations.
